Service automation – Deploy operational tools to optimize operational efficiency

Continuous improvements – Focus on continuous performance improvements by leveraging industry trends and driving towards organization sustainability

Scalability – Flexible engagement models to address the spikes and contingencies in engagement

Reduced costs – Proven methodology, templates and execution approach to transform IT and reduce the total cost of ownership

Improved productivity – Streamline and optimize IT operations and environment through analysis of historical trends

Client speak

GAVS, through their combination of onshore and offshore resources, is a very cost effective model for providing services. GAVS stands out to me in their uncommon commitment to the relationship. They are a cost effective and genuinely great long term partner." - Rob Meilen, CIO, Hunter Douglas

"We expected cost efficiency and savings and we achieved that. What we were pleasantly surprised with, was the high quality implementation effort as well as the tremendous flexibility that GAVS brought to the table" - Ivan Durbak, CIO, Bronx-Lebanon Hospital Center
